					$4,140.00	**15% Down Payment**	

Bid Symbols: Bid = Bid Species; Non-Bid = Non-Bid Species; Area Est. = Sold Area Estimate; AE Non-Bid = Sold Area Estimate & Non-Bid Species
All species woodsrun unless listed otherwise.

Species Scaled: Aspen pulp, Basswood Pulp & Bolts, Birch pulp, Bur Oak pulp, Maple pulp

Species SAE:

Operability:	Firm or Frozen	**Soil Type:**	fine sandy loam
Topography:	flat to slightly rolling, with a side-hill		
Acres:	39		

DRAIN

Type:	Acres Cut:
REGULAR AUCTION SALE	39.00

Total: 39.00

Harvest Specifications

Access
• Latitude/Longitude – Public access location is Lat. 47.747, Long. 94.892. Private access location is Lat. 47.773 N, by Long. 94.902 W.
• Firm or Frozen – Operations may be conducted whenever the site is frozen or when dry and firm to prevent site impacts. Public access is an option, but would require significant roadwork through a tamarack lowland and would be a frozen sale only. Private access is much easier and sale would be a firm or frozen chance.

Cutting and Skidding

• Logging Damage - Logging damage is injury to 30% or more of the crown; or bark damage exposing cambium of 50 sq.in. or more; or damage causing lean of more than 5 degrees from original. Damage to reserve trees, as identified on the Appraisal form, may be subject to a $25/tree penalty

• Reserve tree cutting penalty - Cutting any marked or designated leave tree without pre-approval by the Forester may be subject to a $50.00/tree penalty. On area estimate sales, reserve trees approved for cutting by the Forester must be measured or field scaled for billing at contract rates.

• Skid on contour – Skid on contour, not up/down slope.

• Stumps – Average stump heights below 12” and as low as possible.

• Stay within Boundaries - Unless approved in advance by the Forester, all harvest activities shall be confined to within the marked boundary. Access roads, skid trails and landing areas proposed for use outside the harvest boundary must be approved prior to use. Failure to comply with these requirements may be subject to a $100 penalty per incident.

Harvest and Reserves

• Den Trees – Reserve trees with obvious den and cavity usage, even if not marked to leave.

• Understory Conifer – retain understory conifer to the maximum extent practicable, without damage.

• Aspen block: Blue paint boundaries. Cut all Aspen. Reserve Red Oak, Maple, Birch clumps of 3 or more, & blue painted reserve trees.

• Hardwoods block: Blue paint and natural boundaries. Cut all Aspen, Basswood, & Maple. Reserve Bur Oak <8' and >20", Birch, Red Oak, & blue painted reserve trees.

Landings, Access Roads, and Skid Trails

• Roads stay open - Sale is mostly accessible via existing road system. Roads to remain open and in pre-existing or better condition with BMP drainage after use. Any temporary trail or spur will be closed.

• Landing Rehab - Following use, most landing areas situated inside the harvest boundary should have logging slash scattered and trampled across the ground surface. However, slash shall not be so excessive that it cumulatively covers more than 50% of the landing area.

• Landings Approved – Landing locations must be approved in advance by the Forester. Sale plan includes 2 landings.

Site, Soil, and Water Protection

• Rutting - Contractor must be prepared to shut down equipment operations or hauling if thawing or wet conditions create the potential for rutting. Failure to comply with this requirement may be subject to a $100 penalty per occurrence.

• Soil Protection - Soils are subject to rutting if operated on when wet, stop activity if conditions may lead to rutting, compaction or displacement of soils. Keep BMP applications current to prevent erosion.

Slash Disposal

• Lop and scatter slash to within 2' of the ground. Small, scattered slash piles are encouraged for wildlife.

Tree Size, Marketing, and Special Conditions

• 4 inch TDIB – Utilize all material from butt to a 4” top diameter inside bark.

• No excess culling – Cutting long Butts or oversize tops to produce higher quality product must be done to retain marketable lengths of lower value pulp or firewood. Culling which leaves excessive amounts of wood in unmarketable lengths may be subject to a $10.00 per piece penalty, unless the material is loaded and hauled off site based upon an estimated cord volume.
