• Landings Approved – Landing locations must be approved in advance by the Forester. Sale plan includes 2 landings

Site, Soil, and Water Protection

• Rutting - Contractor must be prepared to shut down equipment operations or hauling if thawing or wet conditions create the potential for rutting. Failure to comply with this requirement may be subject to a $100 penalty per occurrence.

• Soil Protection - Soils are subject to rutting if operated on when wet, stop activity if conditions may lead to rutting, compaction or displacement of soils. Keep BMP applications current to prevent erosion.

Slash Disposal

• Lop and scatter slash to within 2' of the ground. Small, scattered slash piles are encouraged for wildlife.

Tree Size, Marketing, and Special Conditions

• 4 inch TDIB – Utilize all material from butt to a 4” top diameter inside bark.

• No excess culling – Cutting long Butts or oversize tops to produce higher quality product must be done to retain marketable lengths of lower value pulp or firewood.
